

Product Datasheet

Product code: LE-UVWE5D

Product type: Magnifying LED lamp

Made in: China

Description: Ideal-tek LE-UVWE5D lamp features unique illumination options, giving operators the ability to use Ultraviolet (UV) LEDs or standard white LEDs. Operating at 365 nm the UV LED lights can be used to examine conformal coatings, tiny cracks, dust and other particles on circuit boards, weld integrity, holograms, documents, gem identification and any type of materials that fluoresces under inspection. Magnifying lamps reduce eye strain and fatigue while allowing the user to improve his efficacy while inspecting the smallest details. The ESD safe coating prevents damage to sensitive components from electrostatic discharge.
