

**TECHNICAL DATA SHEET**

# Engineering plastic type PTFE

**General notes:**

- » **PTFE** polytetrafluorethylene tips (a material equivalent to Teflon®)
- » extremely low sliding friction coefficient
- » anti-adhesive surface
- » excellent high and low temperature resistance
- » excellent chemical resistance
- » high pressure and wear resistance
- » very good dielectrical behavior
- » water resistant and not inflammable
- » typical applications include handling thin and delicate substrates like glass, metal and silicon wafers while avoiding scratching or breaking of thin layers

## Mechanical properties

Flexural modulus +23°C	<b>500 MPa</b>	ASTM D 790
Tensile modulus +23°C	<b>550 MPa</b>	ASTM D 638
Tensile strength +23°C	<b>27 MPa</b>	ASTM D 638
Tensile elongation at break +23°C	<b>300%</b>	ASTM D 638
Izod - Impact strength (notched) +23°C	<b>186 J/m</b>	ASTM D 256
Hardness, Shore D	<b>50</b>	ASTM D 785

## Thermal properties

Coef. of lin. thermal expansion, normal	<b>13.5 cm/cm °C</b>	ASTM D 696
Continuous Use Temperature	<b>from -100 to +260 °C</b>	20'000 h
Short Time Temperature	<b>+280°C</b>	

## Electrical properties

Volume resistivity	<b>&gt;10<sup>13</sup> Ohm cm</b>	ASTM D 257
--------------------	-----------------------------------	------------

## Other properties

Density	<b>2.18 g/cm<sup>3</sup></b>	ISO 1183
Colour	<b>White</b>	

This document contains information based on average values as obtained from the results of laboratory tests and observations made on the material. Ideal-tek SA declines all responsibility from an improper use of the product described in this document.
